### HALOGEN LAMP WARNING!

This fixture is fitted with halogen lamps which are highly susceptible to damage if improperly handled. Never touch lamp with bare fingers as the oil from your hands will shorten lamp life. Also, never move fixture until lamp has had ample time to cool. Remember, lamps are not covered under warranty conditions.

Congratulations and thank you for purchasing the Lotus™ by American DJ®. For your convenience the Lotus™ has been lamped and tested for quality and is ready to be used. There is no assembly required. Please read the following instructions before installing or operating your new Lotus™.

### **Operating Instructions:**

This unit is ready to be hung or set on a flat surface. The unit is sound activated and will react to the sound of music via its internal microphone. Adjust the sensitivity knob on the back of the unit to react to the music level. Be sure not to obstruct the cooling vents. Keep in a well ventilated area. For best results a fog machine or special effects smoke must be used in order to see the beams of light.

Caution! Never open this unit when in use. Always disconnect the main power before attempting to replace the lamp. Remember always to replace with the same type lamp and fuse.

**Lamp Replacement:** Remove the two thumb screws on trap door located on top of the fixture. Remove and replace the lamp. Replace the cover.

The American DJ Lotus™ comes with a 90 day limited warranty. We recommend filling out the warranty registration card that came with your fixture to validate your warranty. For service contact American DJ.™
