

BATTERY POWERED PORTABLE PA SYSTEM

Galaxy Audio introduces the new TQ6 as the latest addition to our portable lightweight, Traveler Quest PA systems. The TQ6 runs on AC or battery power and comes standard with built-in battery and charger.

Features of the TQ6 include a built-in 30 watt amplifier with an 6" woofer, 1" horn, one XLR/F input with its own volume control, one RCA input with its own volume control, a 1/4" line output, tone control, echo control, master volume control, and built-in media player with its own volume control. The built-in media player enables playing audio from an SD card, USB drive, or from a Bluetooth® enabled device. Features also include an integrated handle for easy transportation and a 1-3/8" (35 mm) socket for stand mounting.

The TQ6 will operate on AC power indefinitely, as well as battery power for about 8 hours depending on the usage†. A full recharge of the batteries takes about 7-8 hours**. The TQ6 may be operated while batteries are recharging. If a power failure occurs when operating on AC, audio will not be interrupted and the unit will continue to operate until batteries are exhausted.

Whether being used for schools, House of Worship, emergency personnel, corporate functions, fairgrounds, auctioneers, graveside funeral services, or aerobics instruction, the TQ6 is a great portable PA that offers superior audio quality and reliable performance, all at an affordable price.

- 30 Watt Amplifier
- Battery Powered
- Rechargeable
- Built-in Bluetooth®
- XLR/Dual RCA Inputs
- Built-in MP3 Player
- Built-in Handle
- Speaker Pole Mount
- Runs up to 8+ Hours
(dependant on programming)

*A Limited 90 Day Warranty Applies to Rechargeable Batteries
**Be sure to charge this unit immediately
†Battery Operation time dependant on program
